

Project Needs Assessment: Cultural & Tourism System

Thank you for participating. This survey collects specific requirements for the new interactive digital cultural map.

 Estimated time: 5 minutes.

 Your feedback will help us enhance local tourism visibility.

Current Issues & Challenges

Help us understand the specific inefficiencies your office currently faces.

What specific issues or inefficiencies do you face when managing/disseminating cultural and tourism information? *

e.g., difficulties with event listings or attraction details.

The LGU Mangatarem Tourism Office faces issues including fragmented and largely manual information management, irregularly updated online content, and a lack of standardized or centralized tourism materials. These challenges, compounded by limited resources and slow coordination with stakeholders who still depend on traditional communication methods, underscore the need to integrate more advanced technologies to improve the accuracy, speed, and overall efficiency of disseminating cultural and tourism information.

How does the current method lead to challenges? *

Examples: Outdated information, lack of visibility, or poor coordination among barangays.

The current method creates challenges because manual processes and traditional communication slow down updates, make information harder to organize, and often lead to inconsistent or outdated content. As a result, sharing accurate and timely cultural and tourism information becomes more difficult.

Estimate the impact of these challenges.

Think in terms of staff time wasted, unanswered inquiries, or lost tourist opportunities.

These challenges can hinder the effectiveness of the LGU Mangatarem Tourism Office, leading to lower tourist engagement, missed promotional opportunities, and reduced support for local cultural heritage, ultimately affecting tourism growth and economic benefits.

System Objectives

In simple terms, what is the ultimate goal you hope to achieve with this system? *

The ultimate goal of this system is to make it easier and faster to manage, update, and share accurate cultural and tourism information, so that tourists, stakeholders, and the community can access reliable information anytime and help promote Mangatarem effectively.

How significant is this project in enhancing local tourism visibility and promoting cultural heritage? *

Scope of the System

Content Contributor Module: What specific tasks must a barangay representative perform? *
e.g., adding an event, updating their barangay profile.

All 82 barangays of Mangatarem should coordinate with the LGU Tourism Office for their cultural events. This collaboration will ensure better promotion, organized planning, and efficient sharing of cultural and tourism information.

Admin Approval Module: What tools does the central office need to monitor content? *

e.g., tools to approve submissions or check quality.

The office can use simple tools like Google Drive to store and organize content, Google Sheets to track updates, and Google Forms for barangay submissions, using shared folders and notifications to ensure information is accurate and up to date.
